Joe Vessell

Designer, Developer, and UX Researcher
https://joevessell.com/

I am a designer and developer with over 19 years of experience taking ideas from start to finish through user experience research, user interface design, front-end development, and design system creation and management.

Design
Wireframes, high-fidelity prototypes, user interface design, WCAG 2.1, typography, color theory, brand identity, and motion graphic design

Front-End Development
HTML, CSS, JavaScript, React.js, Next.js, TypeScript, i18n, Firebase

User Research
User interviews, persona development, story mapping, card sorting, and usability testing

Tools
Figma,Adobe Creative Cloud (Photoshop, Illustrator), VS Code, Claude, Microsoft Office Suite, and Atlassian Products

2024 to Present
Matrix Design Group
Designer, Developer, and UX Researcher

- Lead designer and front-end developer for OmniPro Cloud, a data analytics web app for incident-detection smart cameras.
- Design in Figma and build those designs in production code with Next.js, React, and TypeScript, keeping design intent and the shipped product in sync.
- Designed and built data-heavy analytics dashboards that turn device data into clear, usable views.
- Created and maintain a design system of 260+ reusable components organized with Atomic Design, connecting Figma and production code across multiple products and platforms.
- Use AI design and coding tools such as Claude and Figma daily to prototype and build interfaces faster.
- Created multiple product brands and led stakeholder discussions to align parent and product brands on colors, typography, and logo treatments.

Navigate360 2015 to 2024
Designer, Developer, and UX Researcher

- Led in-depth user research through usability testing and user interviews to uncover user pain points, goals, and behaviors.
- Developed and maintained a comprehensive pattern library that kept multiple products consistent.
- Conducted quality checks against design standards, accessibility guidelines, and front-end development best practices.
- Communicated design decisions to engineers, product owners, and non-technical stakeholders.
- Implemented designs in front-end code using HTML, CSS, JavaScript, and React.js.
- Delivered high-quality design solutions within project timelines and constraints.

Stubenbordt Medical Marketing 2007 to 2015
Designer and Developer

- Developed and customized WordPress websites with responsive designs and cross-browser compatibility.

- Provided ongoing website maintenance, updates, and support to keep WordPress installations secure and stable.
- Created brand identities, including logo design, color schemes, and typography.
- Designed print materials, including brochures, flyers, and posters, that communicated brand messaging to target audiences.

Projects

OmniPro Cloud
Designer and Developer

- Built high-fidelity Figma prototypes and wireframes to discuss and test user flows.
- Developed the application in Next.js with TypeScript.
- Applied accessibility guidelines to both design and front-end development.

Schoowio
Designer, Developer, and UX Researcher

- Performed user interviews to discover pain points and determine product-market fit.
- Designed and developed a website and application using React and Firebase.
- Conducted user feedback sessions and usability testing to refine the product and brand.

PBIS Rewards Application Pattern Libraries
Designer and Front-End Developer

- Built pattern libraries using HTML, CSS, and JavaScript.
- Organized them with Atomic Design methodology.
- Documented past design decisions and discussions.

Professional Development

Bachelor of Science in Art, Graphic Design and Studio Art, University of Southern Indiana
Magna cum Laude GPA 3.8, 2007 Academic Achievement Award in Illustration

Community Involvement

Evansville Design Group, Board Member: Holds student portfolio reviews, yearly awards, and speaker events.

Evansville Technology Interest Group, Member: Meets every other week to discuss technology-based ideas.

812 Run/Walk, Runner: Training for a full marathon.
